

# Sashibhusan Nayak

## Techno-Functional SAP Consultant | S/4HANA Finance x BTP / Build x Business AI (Joule)

S/4HANA · FICO · SAP BTP · SAP Build · Joule · Business AI · RAG · Python · Docker · System Design

Location: Bengaluru, India (Open to Relocate) · Availability: Immediate Joiner

Phone: +91-9776393844 · Email: iam.sb.nayak@gmail.com

LinkedIn: linkedin.com/in/sashibhusan-nayak-72720b3a0 · GitHub: github.com/snayak27 · Portfolio: snayak27.github.io

### PROFESSIONAL SUMMARY

**Targeting an SAP S/4HANA Finance + BTP role on a clear path toward SAP Solution Architect.** A techno-functional profile that combines a **finance-domain foundation** (MBA Finance + hands-on financial reporting and equity/markets analysis) with **deep, self-built AI & agentic-systems knowledge** and an **architect's mindset for system design**. Completed the **SAP S/4HANA Financial Accounting** learning journey (15 courses, with hands-on FICO configuration practice) and the **SAP BTP Solution Architect** journey; currently studying **SAP Build, Joule Studio, and SAP Business AI**. Strong AI grounding — RAG, LLM internals (transformers, embeddings, tokenization), multi-agent orchestration, and the Model Context Protocol — proven by a **10-project agentic-AI platform** architected and directed end-to-end with AI coding agents. Systems-design instinct demonstrated by engineering low-latency algorithmic-trading infrastructure across global markets.

### CORE COMPETENCIES

**SAP Finance (S/4HANA Cloud, Public Edition — FICO) — certified knowledge + self-simulation:** General Ledger (New G/L) · Accounts Payable (P2P) · Accounts Receivable (O2C) · Asset Accounting · Bank Accounting (EBS) · ACDOCA / Universal Journal · OBYC (FI-MM) · VKOA (FI-SD) · Document Splitting · Period & Year-End Close · Financial Statement Reporting · SAP Fiori · SSUI Configuration

**SAP BTP, Build & Business AI — in progress:** SAP BTP architecture & solution areas · SAP Build Apps (low-code) · SAP Build Process Automation · SAP Build Work Zone · Joule Studio & AI Agents · Integration Suite · Solution Diagramming (SAP LeanIX)

**AI Systems & Engineering:** Multi-Agent Orchestration · RAG Pipelines · LLM Routing · Model Context Protocol (MCP) · Vector Databases (ChromaDB) · Knowledge Graphs (Neo4j) · Redis · Docker · Python · LLMops & Agent Governance

**Architecture & System Design:** Solution Blueprinting · SAP Activate Methodology · Distributed Systems & Scalability · Integration & Cost-Estimation Methodology · Business Process Modeling (BPMN) · Low-Latency Infrastructure Design

**Finance Domain:** Financial Statements & Reporting · Financial Analysis · Equity & Capital-Markets Research · Economic & Industry Analysis · Investment Pitch Preparation

### SAP LEARNING & CERTIFICATION TRACK

#### Completed Learning Journeys

- **Implementing Financial Accounting in SAP S/4HANA Cloud** — 15 courses (*S4C01 + F12xx series*): GL, AP, AR, Asset Accounting, Close, Reporting; with **hands-on FICO configuration practice**. *Certification exam-ready: SAP Certified Implementation Consultant – S/4HANA Cloud Public Edition, Financial Accounting.*
- **Becoming an SAP BTP Solution Architect** — *BTP001* (+ prerequisite *BTP100*) + SAP LeanIX solution-diagram practical; architectural methodologies (Integration Solution Advisory, Data & Analytics Advisory, Cost Estimation). *Working toward: SAP Certified – Solution Architect, SAP BTP.*

#### In Progress

- **Developing with SAP Build – From Apps to Automation** — *BTP100, SPA400 (Process Automation), WZ400 (Work Zone), AIJ100 (Joule Studio – AI Agents)*. *Working toward: SAP Certified – SAP Build Developer.*

#### In Queue

- Implementing Management Accounting in SAP S/4HANA Cloud — CO: Overhead Cost Accounting, CO-PA, Product Costing (*S4C01 + F22xx*)
- Discovering SAP Business AI Capabilities for SAP Finance (*F0011, F0014*)
- Adminstrating SAP Business Technology Platform — landscapes, IAM, HA/DR, governance

### PROJECTS

#### SAP — S/4HANA Cloud (Public Edition) Finance Business-Process Simulation (*self-initiated*)

- Configured Financial Accounting using **Self-Service Configuration UIs (SSCUI)** in *Manage Your Solution*; set up enterprise structure, G/L and master data.
- Executed end-to-end **P2P** and **O2C** finance flows through **SAP Fiori apps** (Post General Journal Entries, Manage Journal Entries, Manage Supplier/Customer Line Items, Asset Accounting apps).
- Explored the **Universal Journal (ACDOCA)** via standard reporting apps (Trial Balance, Display Financial Statements); practiced period- and year-end close activities.
- Produced an **SAP BTP Solution Diagram** (SAP LeanIX) mapping application, integration, data and AI layers for a finance use case.

#### AI / Systems Engineering Portfolio (*10 live projects — architected & AI-orchestrated*)

*Designed the architecture and directed AI coding agents (Claude Code) to implement; integrated and debugged end-to-end.*

10 projects · 34 MCP tools · 23,000+ notes indexed · 46 AI-governance rules · ~80% cache-hit RAG · \$0 cloud cost

- **HIVE — Multi-Agent AI Platform** · self-bootstrapping platform deploying **34 MCP tools across 4 Docker service tiers** via a FastMCP auto-discovery gateway, one-script deploy. [snayak27.github.io/hive/](https://snayak27.github.io/hive/)

- **Second Brain** — 4-Database RAG & Knowledge Graph · semantic + entity search over **23,000+ notes** (ChromaDB, Neo4j, PostgreSQL) with sub-millisecond retrieval. [snayak27.github.io/second-brain/](https://snayak27.github.io/second-brain/)
- **LLMOps Governance Layer** · **46 behavioral rules + 11 Python lifecycle hooks**; agent self-monitoring (goal-drift detection, token-budget control, audit trail). [snayak27.github.io/behavioral-rules/](https://snayak27.github.io/behavioral-rules/)
- **Organic URL Index** — **RAG Data Pipeline** · 4-tier cache-first search (Redis, SQLite, SearXNG, Tavily) with content-addressed storage; **~80% local cache-hit rate**. [snayak27.github.io/organic-url-index/](https://snayak27.github.io/organic-url-index/)
- **UAC** — **Agent Observability & Memory** · cross-session state (48h continuity), 3 self-correcting feedback loops, real-time drift detection. [snayak27.github.io/uac/](https://snayak27.github.io/uac/)
- **Claw Router** — **Benchmark-Driven LLM Router** · routes tasks to optimal models with critic-revise quality loops and cost gating. [snayak27.github.io/claw-router/](https://snayak27.github.io/claw-router/)
- *Also: Brave Bridge (live-browser AI bridge), Hermes Agent (autonomous scheduled workflows), Cloak Browser (stealth automation), Pi-hole Stack (open-source DNS security).*

Full portfolio & ecosystem map: [snayak27.github.io](https://snayak27.github.io)

## PROFESSIONAL EXPERIENCE

### Independent SAP & AI Systems Upskilling — Hyderabad & Bengaluru

Jul 2025 – Present

- Self-funded, full-time upskilling toward a future-proof SAP techno-functional / architect role.
- Evaluated formal SAP training options (incl. classroom institutes) and chose **self-directed learning on SAP's official learning platform** to focus on the **latest S/4HANA Cloud & BTP curriculum** rather than legacy ECC content.
- Completed the **S/4HANA Financial Accounting** (15-course) journey **with hands-on FICO configuration practice**, and the **SAP BTP Solution Architect** journey; currently studying SAP Build, Joule Studio and SAP Business AI.
- Architected and shipped a **10-project agentic-AI engineering portfolio**, deepening system-design and LLMOps expertise.

### Finance Associate — MCB & CO, Chartered Accountants — Balugaon, Odisha

Feb 2024 – Jul 2025

- Delivered **financial reporting & analysis**, preparation of **financial statements**, bookkeeping and client accounts, and **audit & tax compliance**.
- Pivoted into **equity-market & investment analysis** — performed economic and industry analysis and prepared **investment pitches** for clients (focus on “right price, right time”).

### Independent Investment & Algo-Trading Practitioner (*self-directed / family capital*)

2019 – Present

- **Designed algorithmic trading logic** across equity, currency, commodity and crypto markets — defining data combinations, signals and decision rules.
- **Engineered low-latency infrastructure** — co-located AWS (Mumbai) near NSE/BSE/broker servers to minimise execution latency.
- Directed implementation of **hundreds of strategy scripts (Python)** running 24×7 on cloud; now leveraging agentic AI for build and maintenance.

### Business Planning Associate — Real Estate — Private Developer, Bhubaneswar

Jun 2021 – Oct 2022

- Supported the developer's pivot from plotting to **apartment business**.
- Conducted **location & buyer-demand research** (e.g., property preferences near AIIMS Bhubaneswar) to inform product and planning decisions.

## EDUCATION

- **MBA, Finance** — Biju Patnaik University of Technology, Odisha · 2022–2024
- **BBA** — Trident Academy of Creative Technology (TACT), Bhubaneswar · 2018–2021 · Grade A
- **Higher Secondary (Science — PCMB)** — Jupiter Science College · 2016–2018 · Grade A

## CERTIFICATIONS & CREDENTIALS

- **Generative AI with Large Language Models** — DeepLearning.AI & AWS (*completed*)
- **SAP Certified – Implementation Consultant, S/4HANA Cloud Public Edition: Financial Accounting** — learning journey completed, certification exam-ready
- **SAP Certified – Solution Architect, SAP BTP** — learning journey completed (BTP001), working toward certification
- **SAP Certified – SAP Build Developer** — in progress

## FOUNDATIONS & CONTINUOUS LEARNING

- **Computer science & system-design fundamentals** — the evolution from the 1945 first computer through the PC, internet, cloud and AI eras; distributed systems, scalability, frontend/backend, and how the internet works (self-directed structured study).
- **LLM & Generative-AI internals** — transformer architecture & attention, mixture-of-experts, tokenization, vector embeddings, GPU parallelism, RAG, and the Model Context Protocol (MCP).
- **Agentic AI & LLMOps** — continuous hands-on practice via a personal homelab: multi-agent orchestration, agent governance, observability, and cross-session memory.
- **Business process modeling (BPMN)** — modeling and documenting business processes for automation and solution design.
